## SITE PLAN REQUIREMENTS FOR SEPTIC TANK ABANDONMENT AND CONNECTION TO CITY SEWER

Prior to plumbing permit issuance, the owner must fill out a sewer connection application from the Public Works Department and pay applicable sewer connection fees.

The City can install the sewer lateral from the main to your property line for a fee (for estimate contact Public Works Operations) or the owner can hire a private contractor to install lateral. If a private contractor is desired, he must obtain an excavation permit from the Public Works Department for the installation.

Basic sewer lateral requirements are as follows: sewer laterals in the street right of way need to be at least 10' away from trees and 5' away from all other items such as water meters, driveways, street lights, etc., use piping of approved material and have a minimum 2% slope.
